Assignment No. 4

//class component

import React from 'react';
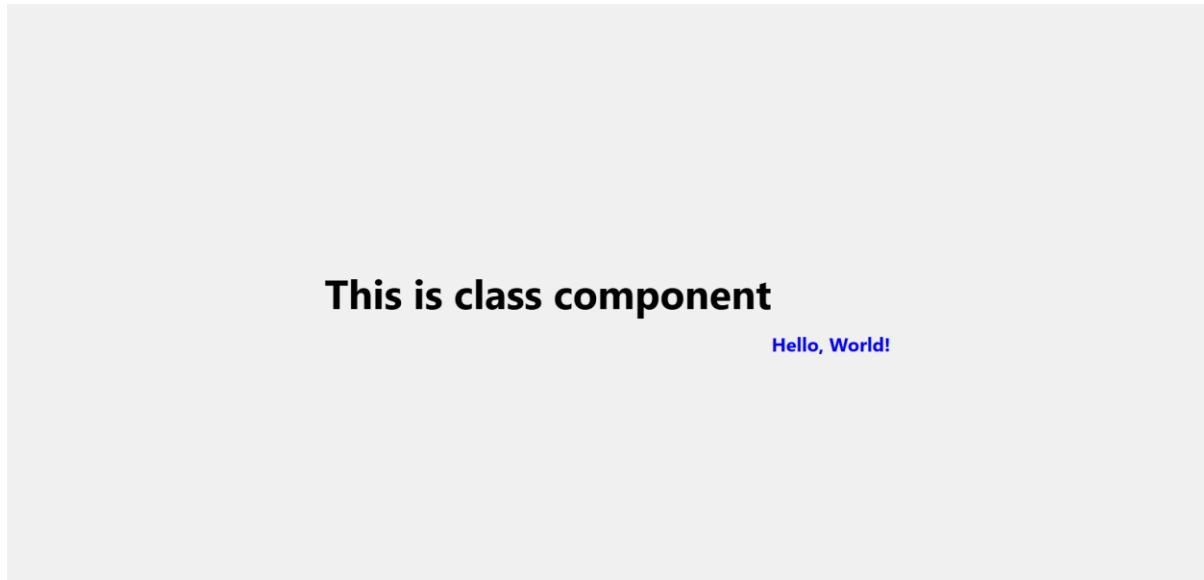

class Hello extends React.Component{

  render(){

    return <>

     <h1 style={{color: 'black',marginLeft:'0px'}}>This is class component</h1>

      <h2 style={{color: 'blue',marginTop: '150px'}}>Hello, World!</h2>

    </>

  }

}

export default Hello;

Output:

```
//Functional Component
import React, { useState } from 'react'
function Increment() {
 const [count, setCount] = useState(0)

 return (
  <>
    <div className="card">
     <h1 style={{ color: 'black', marginLeft: '0px' }}>This is functional component</h1>
     <button onClick={() => setCount((count) => count + 1)}>
      count is {count}
     </button>
    </div>
  </>
 )
}
export default Increment
```

Output:
